This is to certify that the above was tested visually and functionally and no defect affecting its safe use was found **at the time of inspection**. The equipment is safe to operate for its intended use within the design limits specified, provided there is continuous maintenance applied, a qualified operator is employed, and it is operated only within a slope of maximum angle of 7°. This document is valid until the date of next inspection or the date from which any major repair / alteration is done to the equipment; whichever occurs earlier.

**Warning:**

- The equipment is safe to operate for its intended use within the design limits specified, provided there is continuous maintenance applied, a qualified operator is employed, and it is operated only within a slope of maximum angle of 7°.
- This document is valid until the date of next inspection or the date from which any major repair / alteration is done to the equipment; whichever occurs earlier.
- This certificate is not valid unless authenticated by FAHSS inspection stamp and signature.

"This document is issued subject to the condition that nothing herein contained shall be deemed to relieve any designer, manufacturer, seller, repairer, or operator of any warranty, express or implied and FAHSS/TUV liability shall be limited to the acts or omissions of its employees, agents, and sub-contractors. FAHSS/TUV shall in no event be liable for any injury or damage to any person or property occurring by reason of negligent operation or lack of proper maintenance or any defect in materials, machinery, equipment, or other items other than such defects ascertainable by normally accepted testing standards and only upon those items inspected by FAHSS/TUV and which are covered under this document."
